

Table of Contents

Preamble

Organisers/Sponsors

[Gabriel Del Barrio:](#)

Assessment and Monitoring of Desertification: A Geomatic Approach

[Mark Mulligan:](#)

Geobrowser Based Simulation Models for Land Degradation Policy Support

[Joachim Hill:](#)

Dryland Degradation and Desertification: Satellite-Based Assessment and Monitoring Concepts for a Global Problem

[Mojib Latif:](#)

The Climate of the 20th and 21st Century

[Detlef Stammer:](#)

Ocean Reanalyses: Status and Their Use for Improving Climate Forecasts

[Vladimir Krapivin and Ferdenant Mkrtychyan:](#)

An Adaptive Remote Sensing Technology for the Nature-Society System Biocomplexity Assessment

[Pavel A. Propastin and Martin Kappas:](#)

Linkages Between the Current Climate Changes, the Political Change in Kazakhstan and Trends in the Photosynthetic Activity of Vegetation

[Yong Xue, Wei Wan, Ying Wang, Yingjie Li, Jie Guang, Jianwen Ai and Linyan Bai:](#)

High Performance Geocomputation for Digital Earth: A Case Study of Aerosol Retrieval from Remotely Sensed Data

[Hans-Martin Füssel:](#)

Climate, Geography and Macroeconomics: Revised Data, Refined Analysis and New Findings

[Siegfried Schubert:](#)

NASA's Modern Era Retrospective-Analysis for Research and Applications (MERRA): Early Results and Future Directions

[Salihou, Youssouf Loya, Longin Some, Blaise Some, Marc Daniel and Jean Sequeira:](#)

Remote Sensing and Modeling Contribution to Ecosystem Control in Burkina Faso

[Theres Peisker, Daniel Spengler, Karl Segl, Sibylle Itzerott and Hermann Kaufmann:](#)

Simulation of Hyperspectral Reflectance Data Using Artificial 3D Crop Fields

[Ehsan Forootan and Mohammad Ali Sharifi:](#)

Multi-Sensor Analysis of the Lake Victoria Variations

[Christoph Stasch, Alexander C. Walkowski and Simon Jirka:](#)

A Geosensor Network Architecture for Disaster Management Based on Open Standards

[Michael F. Goodchild:](#)

Simulation, Modeling and Digital Earth: Status and Prospects

[Thomas Blaschke, Markus Biberacher, Sabine Gadocha, Daniela Zocher, Manfred Mittlböck, Eva Haslauer, Ingrid Schardinger and Josef Strobl:](#)

Virtual Power Plants: Spatial Energy Models in Times of Climate Change

[Vladimir Krapivin and Ferdinant Mkrtchyan:](#)

GIMS: Technology for the Operative Environmental Diagnostics

[Eva Ivits, Michael Cherlet, Graeme Buchanan and Dan Chamberlain:](#)

Remote Sensing Derived Phenological Indicators to Explain European Farmland Birds Distribution Pattern

[Robert Corner and Marco Marinelli:](#)

Modelling the Effects of Data Uncertainty on Agricultural and Environmental Models Under Global Change Conditions

[Huadong Guo:](#)

ABCC Program: Global Change Study Using Space Technology

[Adam Roff, Dominic Sivertsen, Geoffrey R. Taylor, Michael Day and Anthea L. Mitchell:](#)

Beyond Land-Cover Mapping: Semi-Automated Delineation of Vegetation Pattern Using Segmentation

[Christoph Aubrecht, Mario Köstl and Klaus Steinnocher:](#)

Functional Object Grouping: An advanced Method for Integrated Spatial and Space Related Data Mining

[Dirk Tiede and Stefan Lang:](#)

Rapid Dwelling Extraction from VHSR Satellite Imagery in Refugee Camps and Dissemination of Conditioned Information via Virtual Globes

[Pavel Milenov, Dimitrios Kapnias and Wim Devos:](#)

Best Practice and Quality Checking of Ortho Imagery: Toward a Common Approach

[Gertrud Schaab, Patrick Dammann, Florence N. Muchori, Nirmal Ojha and Hannes Zimmer:](#)

Biodiversity Monitoring and Forest Management Involving Geospatial Data in Kakamega Forest (Kenya): Tools Tailored to the Users' Needs

[Sören Hese:](#)

Strategies for Object-Oriented Thermokarst Lake Change Analysis in Siberia Using very High Resolution Satellite Data

[Christian Graul and Alexander Zipf:](#)

Biogeographic Research and the Spatial Web: Towards Interoperable Analysis Tools for Global Change Based on the Web Processing Service (WPS)

[Ulrich Boes and Raina Pavlova:](#)

Spatial Data Infrastructures by 2020: Where do They go?

[Daniel Doktor, Alberte Bondeau, Dirk Koslowsky and Franz-W. Badeck:](#)

On the Comparison of Point and Area-Wide Observations of Vegetation

[Emanuele Gennai:](#)

Interoperability and Spatial Data Infrastructures: From Data Collection to Actionable Information

[David Wortley:](#)

Integrating Physical and Virtual Worlds for Sustainable Development

[Florian Hruby, Jürgen Kristen and Andreas Riedl:](#)

Global Stories on Tactile Hyperglobes: Visualizing Global Change Research for Global Change Actors

[Philip Paar, Katy Appleton, Malte Clasen, Maria Gensel, Simon Jude and Andrew Lovett:](#)

Interactive Visual Simulation of Coastal Landscape Change

[Deren Li, Jingxiaong Zhang and Lite Shi:](#)

Role of Geospatial Technology in Wenchuan Earthquake

[Jacqueline Lelievre and Allison Kealy:](#)

Homogenous Positioning Using CORS Networks in a Digital Earth

[Norbert De Lange and Christian Plass:](#)

WebGIS with Google Maps

[Tim Häring, Michael de Paly, Carsten Hennekes and Volker Hochschild:](#)

Modelling Tsunami Vulnerability: The Development of a Tsunami Inundation Model with Machine Learning Tools

[Daniel Lincke, Cezar Ionescu and Nicola Botta:](#)

A Generic Library for Earth System Modelling Based on Monadic Systems

[Dimitra Vassilaki, Charalambos Ioannidis and Athanassios Stamos:](#)

Geospatial Data Integration Using Automatic Global Matching of Free-Form Curves

[Oliver Gruebner, Benjamin Jakimow, Katja Janson, Tobia Lakes and Patrick Hostert:](#)

Linking Ecological, Socioeconomic, and Health Data in a Health Model to Analyse Complex Dynamics in Informal Settlements in Dhaka, Bangladesh

[Gunter Zeug, Sandra Eckert, Ulrich Steiner, Thomas Kukuk and Daniele Ehrlich:](#)

Monitoring Urban Growth and its Impact on the Environment: The Case of Sana'a, Yemen

Tobia Lakes and Sven Lautenbach:

Modelling Urban Land Use Systems Under Transition: From Socialist to Post-Socialist Dynamics in Urban Areas

Matthias S. Moeller and Elisabeth Schöpfer:

Metropolitan Growth Mapped from Space Images

Thomas Nocke, Till Sterzel, Michael Böttinger and Markus Wrobel:

Visualization of Climate and Climate Change Data: An Overview

Jean-Philippe Aurambout and Chris Pettit:

Digital Globes: Gates to the Digital Earth

Jochen Schiewe, Alenka Krek, Irene Peters, Harald Sternberg and Karl-Peter Traub:

HCU Research Group "Digital City": Developing and Evaluating Tools for Urban Research

Carsten Neumann:

Linkage of Climate Variables from AVHRR Raster Data to the Heterogeneous Layout of Sub-Catchments in the Ebro Basin

Márta Gaál:

Expected Changes in Climatic Conditions of Maize Growing: Hungarian Case Study

Jens Klawitter, Paul-Michael Dekker, Peter Meisen and John Graham

The GENI Initiative Visualization

Walter H. Mayer:

Planning and Valuation of Ecological Performances with the Holistic and Integrated Agro-Environment Software-Technology AGROffice

Posterpresentations**Dingui Zhu and Jianping Fan:**

PSDC: Parallel Simulation of Digital City

Brian A. Hope, Connie Kamrowski and David Tien:

Refined Geo-Referenced Image and Imagery Metadata Standards for SDI Implementation

Hong Jiang, Xiao-qin Wang, Wei-jing Sun and Qin-min Wang:

Simulation and Spatial-Temporal Analysis of Forest Net Primary Productivity in Fujian Province, China

Yangming Jiang and Siwen Bi:

Dynamic Object-Oriented Model and its Applications for Digital Earth

Volodymyr Korchinsky and Vjacheslav Voloshin:

The Novel Method for Improvement of Information Density in Satellite-Acquired Multi-Spectral Images

[Jian Lian, Xiaojuan Li and Huili Gong:](#)

Research and Development of GIS Project Based on XML

[Siyuan Liu, Gaojin Wen, Wenjing Cao, Shenzhong Feng and Jianping Fan:](#)

The Feasibility Analysis and Evaluation in Water Transfer Project and Environment Change

[Lv Pang, GuoQing Li and Yunxuan Yan:](#)

Research on Parallel Buffer Analysis Based on Grided Based HPC

[Mikhail A. Popov, Sergey A. Stankevich, Aleksey I. Sakhatsky and Anna A. Kozlova:](#)

Multispectral Imagery Normalized Band-Difference Indexes for Land Cover Classification

[Debin Qu, Chen Cui and Weifeng Liu:](#)

New Computer Graphics Technologies for Digital Earth Visualization

[Marian Rybanský:](#)

Critical Transport Factors using Roads and Terrain During Crisis Situations and Natural Disasters

[Alireza Sharifi, Negin Fouladi Moghaddam and Mohammad Ali Rajabi:](#)

Evaluation of Thermal Islands Logical Relation with Lineament Density Changes in Pre and Post-Earthquake Satellite Images

[Serge Shumilov, Antonio Rogmann and Joscha Laubach:](#)

GLOWA Volta Geoportal: An Interactive Geodata Repository and Communication System

[Valery Starovoitov and Aliaksei Makarau:](#)

Multispectral Image Pre-Processing for Interactive Satellite Image Classification

[Olexandr Tarariko, Olexandr Syrotenko and Valeriy Grekov:](#)

Net of Agrarian Testing Polygons in System of Remote Monitoring of Agrarian Resources in Ukraine

[Hui Lin and Jinsong Chen:](#)

Monitoring Sugarcane Growth Using ENVISAT ASAR Data
