Alessandro Annoni obtained the degree in Physics from the University of Milan in 1979. He has more than twenty years of working experiences in various environmental fields (forestry, agriculture, hydrology, landscape, nature protection and conservation,..) dealing with spatial planning, spatial analysis, environmental modeling, Geo-Information and related technologies (GIS), remote sensing, image processing, system design and software development.

Since 1997 he is working in the European Commission's Joint Research Centre (JRC) at the Institute for Environment and Sustainability, in Ispra, Italy. He is currently responsible of a highly competent and motivated technical team of 23 scientists working on European Spatial Data Infrastructure, the largest group in Europe in this field.

Since 2001 he is the Technical Coordinator of the INSPIRE (Infrastructure for Spatial Information in Europe) initiative ensuring the technical coherence and exchange of information between the INSPIRE working groups, and the liaison with the European and international research community and their networks and initiatives.

Alessandro Annoni has established international partnerships between JRC and US and Canada to develop synergies in SDI implementation and leverage joint working in global initiatives such as GEOSS and GSDI. Alessandro Annoni participates(d) in several European projects relevant for Spatial Information (SAFIR, ORCHESTRA, .. GINIE, ETEMII, PANEL-GI, NATURE-GIS, GIPSIE, ..) and is author, co-author and editor of more than hundred papers and books related to GIS and Remote-Sensing.
