21-25 April 2025 Chongging, China Theme: Digital Earth Facilitating Sustainable Development Goals

The Sustainable Development Goals (SDGs) are at the core of the United Nations 2030 Agenda for Sustainable Development. Currently, the implementation of the 2030 Agenda faces multiple challenges. How to address the challenges of sustainable development and support the achievement of global SDGs has become a global focus. The advancement of digital earth technology, especially the rapid development of digital transformation, has shown great potential in solving sustainable development problems. To promote international exchanges and cooperation in the field of dig-

ital earth globally, the International Symposium on Digital Earth has been successfully held in 10 countries for 13 series

of conferences, attracting much attention and support. From April 21 to 25, 2025, the 14th International Symposium on Digital Earth, jointly hosted by the International Society for Digital Earth (ISDE) and Southwest University, will be held in Chongqing, China. With the theme of "Digital Earth Facilitating Sustainable Development Goals", the conference aims at the hot frontiers and major scientific issues in the field of digital earth at home and abroad, promoting digital earth technology to play a greater role in achieving the SDGs. Taking this conference as an opportunity, it will also meet the major strategic needs of the construction of Digital Chongqing and comprehensively promote the imple mentation of Chinese modernization in Chongqing. Through this conference, experts and scholars from the scientific community, education sector, government departments industry enterprises, international organizations and institutions in the field of global digital earth will be further gath ered to share the latest theories, technologies and application progress of digital earth, exchange new ideas, new disapplication demonstration, thus contributing to the prog ress of digital earth science and technology in China and promoting the role of earth big data science and technolo-

coveries and new progress in technological innovation and gy in major scientific discoveries and the national strategy of self-reliance and self-improvement in science and tech nology. The relevant matters are hereby notified as follows: CONFERENCE DATE AND VENUE
